Intelligent moon garden lamp lighting system

Intelligent peony garden lamp lighting system

5g micro module

The pole can be reserved for moile, unicom, telecom, tower communication base station as relay coverage.

Sensor extension

Extended access: infrared sensor, radar, traffic monitoring sensor, RFID communication.

Intelligent lighting control

Realize intelligent control of lamps, dimming, switching, voltage, current, power, electricity statistics, ault warning, energy consumption analysis, GIS map, stategy control, loop monitoring, etc.

Enviromental monitoring

Intelligent street light are equipped with a variety of sound sensors, air pollution detector temperature sensor, brightness sensor, etc., used for wind direction, wind speed, temperature, rainfall, water level, and noise to achieve intelligent detection of the urban environment and weather.

WIF hotspot

The street lamp is embedded with WIFI base station to achieve the coverage of WIFI hotspots in the whole area, dual-frequency communication 2.4G/5G coexistence, well development access to 200 points, the distance of 70M, support the operation system, can be extended probe application, traffic statistics and other applications.

One-touch calling

Support one-touch calling can directly talk to monitoring room.

Intelligent charging pile

Built-in lamp pole, international interface, support platform statistics management, support APP self-charge, support process managment, operation level, monthly settlement.

Broadcast system

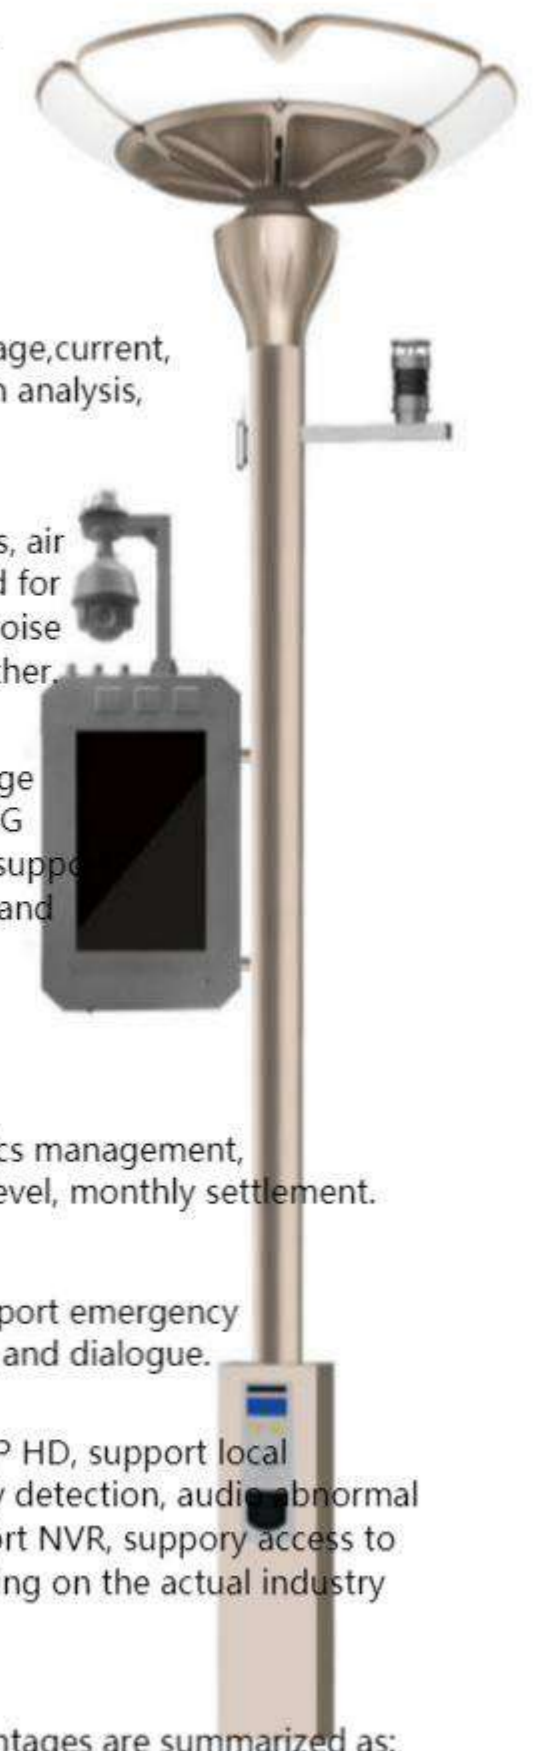

Built-in 30W waterproof sound column, support background music, support emergency broadcasting, support timing and monitoring room microphone polling and dialogue.

Video surveillance

3 million HD ball machine, support 360 degree rotation, support 1080P HD, support local storage, support SMART detection: area intrusion detection, boundary detection, audio abnormal detection, mobile detection, video acclusion detection function, support NVR, support access to the public security network, support video data later analysis (depending on the actual industry application) support remote view.

Electronic advertising screen

LED has been widely valued and developed rapidly, is inseparable from its own advantage. These advantages are summarized as: high brightness, low operating voltage, low power consumption, miniaturization, long life, impact resistance and stable performance. The development prospect of LED is very broad, and it is developing towards higher brightness, higher weather resistance, higher luminous density, higher luminous uniformity, reliability and panchromatic direction.

Product characteristics

Cast off inertia thinking, gift ordinary thing with unique expression form, regard lamps and lanterns as the change switch of dimensional atmosphere

Modelling atmospheric plain, the night lights up like a bright moon, so it is the light of the the moon

Material aelection of high strength die-cast aluminun alloy shell, the light itself smooth lines seamless, elegant and charming.

Moon Ring

Protection Grade	IP65
Rated Power	30-100W
Input Voltage	110-220vAc
Lifespan	50000hrs

Moon ring

Product characteristics
In the 21st century, standing at the peak of science and technology,
looking across the vast galaxy, the stars are scattered, and the
ring lamp is the brightest star in the galaxy.

Overall Dimensions

outer diameter: 89
inner diameter: 76

white cover/module style

THE RING

Protection Grade	IP65
Rated Power	50W
Input Voltage	110-220vAc
Lifespan	50000hrs

The ring

Product characteristics

In the 21st century, standing at the peak of science and technology, looking across the vast galaxy, the stars are scattered, and the light of the milky way lamp is the brightest star in the galaxy.

Overall Dimensions

Utility model/solar model

THE LIGHT OF THE MILKY WAY

Protection Grade	IP65
Rated Power	30-60W
Input Voltage	110-220vAc
Lifespan	50000hrs

The light of the milky way

Product characteristics

Garden lighting.XiangYun.

This is the most beautiful cloud under the blue sky, the beautiful scenery around you during the day, and the brightest lamp in front of you at night. The luminaire modeling elements are charming, the luminous surface is the light source is also the design point, like the universe galaxy when lit up.

In line with the Western aesthetics while retaining the eastern flavor.
Material selection of high strength die-cast aluminum alloy shell.
Modern and simple design is suitable for any scene.

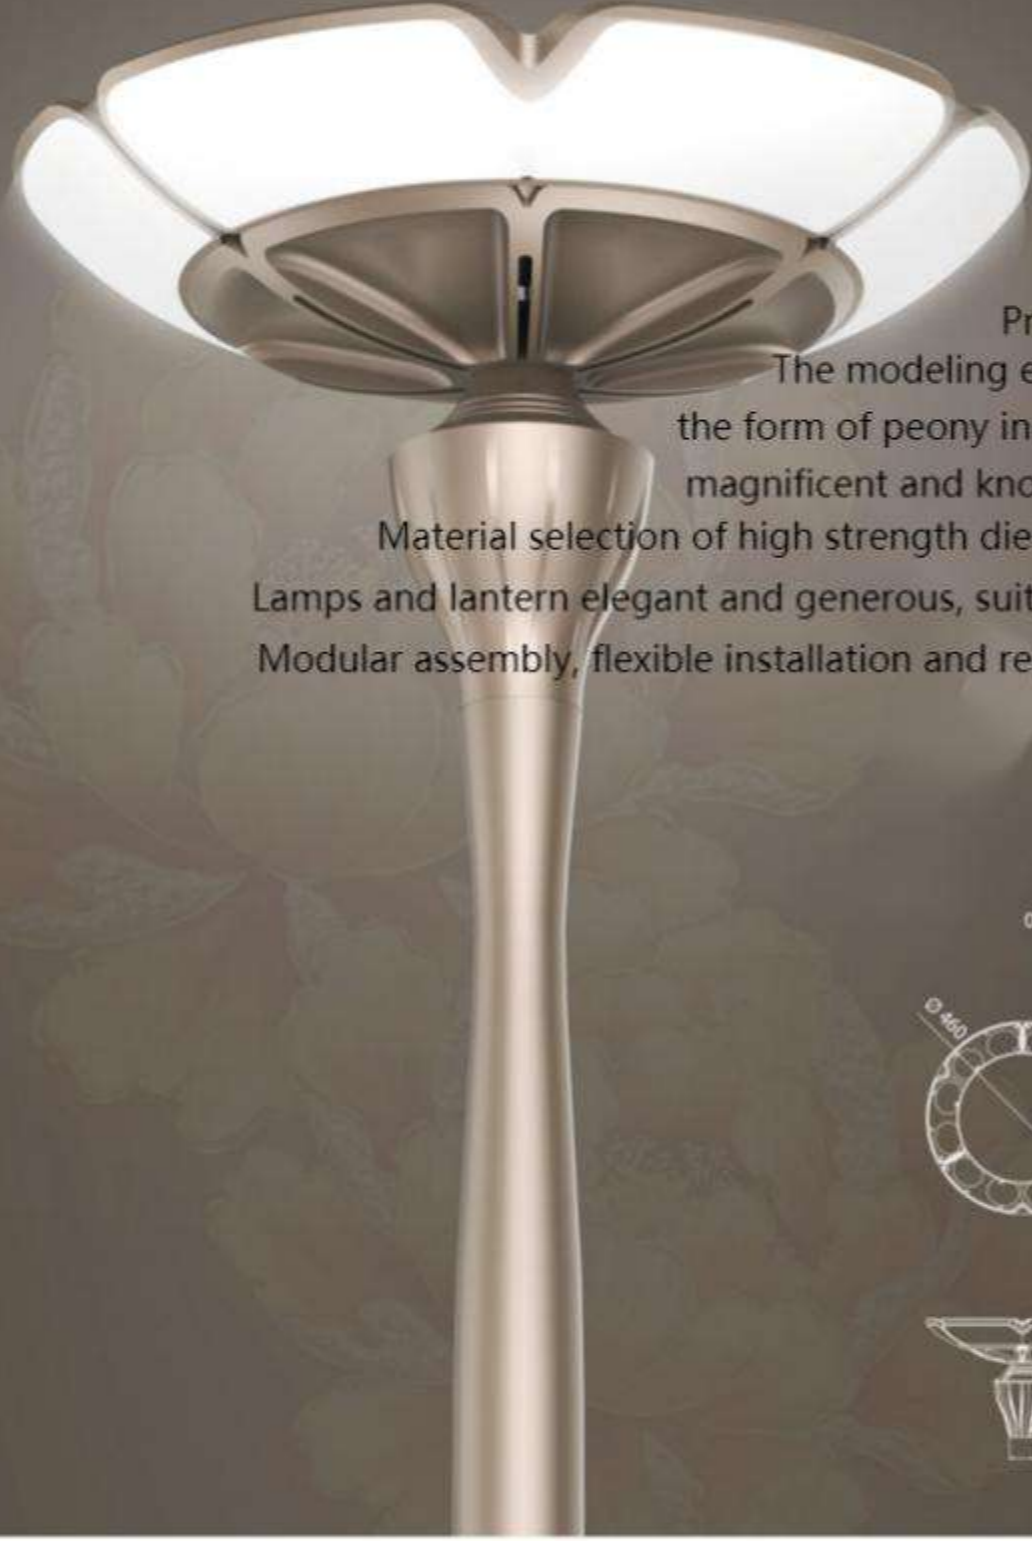

Protection Grade	IP65
Rated Power	30-120W
Input Voltage	110-220vAc
Lifespan	50000hrs

XIANGYUN

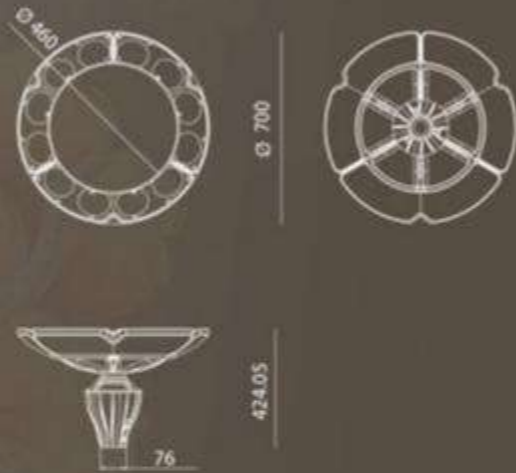

XIANGYUN

Product characteristics
The modeling elements are extracted from the form of peony in it's heyday. Peony is magnificent and known as the king of flowers. Material selection of high strength die-cast aluminum alloy shell. Lamps and lantern elegant and generous, suitable for all kinds of scenes. Modular assembly, flexible installation and replacement.

Overall Dimensions

Protection Grade	IP65
Rated Power	60-180W
Input Voltage	110-220vAc
Lifespan	50000hrs

Flourishing Age Peony

Flourishing age peony

Product characteristics

The word "star" to brilliant lights in poetry and literature.
The design of the lamps are simple and charming.

The luminous surface is both the light source and the design point.

When it lights up, it looking like the milky way of the universe, so it named the light of stars.

Material selection of high die-cast aluminum alloy shell.
In line with the western aesthetics while retaining the eastern flavor.

Modern and simple design is suitable for any scene.

Overall Dimensions

Front mounting

Star Light

Protection Grade	IP65
Rated Power	30-100W
Input Voltage	110-220vAc
Lifespan	50000hrs

Star light--front mounting

Product characteristics are the same with front mounting.

Side mounting
Star Light

Protection Grade	IP65
Rated Power	30-100W
Input Voltage	110-220vAc
Lifespan	50000hrs

Star light--side mounting
